About Me

Technology Project & Program Manager with experience delivering enterprise-scale initiatives across Agile, Scrum, Waterfall, and Kanban environments. Experienced in leading concurrent projects, coordinating cross-functional teams, managing stakeholders, and driving predictable delivery outcomes.

I specialize in project execution, release management, risk mitigation, workflow optimization, and transparent communication between technical teams and business stakeholders.

Currently working at **Wolters Kluwer**, where I lead technology initiatives, release planning, ETL delivery operations, and enterprise modernization programs.

Professional Experience

Technology Project & Program Manager

Wolters Kluwer

Apr 2025 – Present

Leading enterprise technology initiatives, stakeholder coordination, project governance, delivery tracking, risk management, and cross-functional execution.

Associate Technology Project & Program Manager

Wolters Kluwer

Aug 2023 – Apr 2025

Managed Agile and Waterfall projects, ETL delivery operations, sprint planning, release coordination, and stakeholder reporting across multiple business divisions.

Project Management Intern

Wolters Kluwer

Mar 2023 – Aug 2023

Supported project execution, delivery tracking, documentation, reporting, and operational workflows.

Featured Project

IC Usage to Snowflake Migration

Enterprise Data Warehouse Modernization

Duration: Mar 2024 – Jun 2024

Project Highlights

- Led the organization's first Snowflake implementation.
- Successfully migrated more than **35 TB** of enterprise usage data.
- Modernized legacy Oracle-based data infrastructure.
- Improved reporting efficiency and query performance.
- Reduced dependency on Oracle RDS compute and storage.
- Delivered the project **one month ahead of schedule**.

Responsibilities

- Project planning and execution
- Stakeholder alignment
- Risk and dependency management
- Executive reporting
- QA and UAT coordination
- Production deployment planning
- Cross-functional team coordination

Outcome

Established a scalable cloud-based data platform and accelerated enterprise reporting capabilities while reducing infrastructure dependency.

Delivery & Release Management

Agile Scrum Delivery

- Managed ETL delivery teams.
 - Owned sprint planning and execution.
 - Facilitated Scrum ceremonies.
 - Managed release readiness activities.
 - Coordinated recurring production deployments.
 - Improved delivery transparency through Jira automation.
 - Led retrospective-driven process improvements.
-

ETL Operations & Incident Management

- Coordinated operational support across multiple business divisions.
 - Managed incident prioritization using SLA impact assessment.
 - Maintained Kanban workflows for visibility and throughput.
 - Implemented automated Jira notifications for production incidents.
 - Improved stakeholder communication and response times.
-

Core Competencies

Project & Program Management

- Project Planning
- Program Coordination
- Portfolio Tracking
- Delivery Governance
- Release Management

Agile Delivery

- Scrum
- Kanban
- Sprint Planning
- Backlog Management
- Retrospectives
- Daily Standups

Leadership

- Stakeholder Management
- Executive Reporting

- Cross-functional Collaboration
- Team Coordination
- Communication Management

Risk Management

- Risk Identification
 - Dependency Tracking
 - Issue Resolution
 - Escalation Management
-

Technical Skills

Project Management Tools

Jira (Advanced)

- Scrum Boards
- Kanban Boards
- Workflow Automation
- Jira Integrations
- Dashboard Reporting

Smartsheet

- Project Timelines
- Status Dashboards
- Delivery Reporting

Excel

- Risk Registers
- Project Plans
- Delivery Trackers
- Reporting Templates

Miro

- Sprint Planning
 - Retrospectives
 - Team Workshops
 - Brainstorming Sessions
-

Achievements

- 🏆 Delivered Snowflake Migration one month ahead of schedule
 - 🏆 Led organization's first Snowflake implementation
 - 🏆 Successfully migrated 35+ TB enterprise data
 - 🏆 Improved release visibility through Jira automation
 - 🏆 Enhanced stakeholder communication through automated reporting workflows
-

Education

Bachelor of Engineering (B.E.)

Electronics & Instrumentation Engineering

2019 – 2023

Areas of Interest

- Technical Program Management
 - Enterprise Transformation
 - Cloud Migration Programs
 - Data Platform Modernization
 - Agile Delivery Excellence
 - Process Optimization
 - Release Management
 - Leadership Development
